Field notes of the Survey of  
an Island in Wabash River  
lying partly in Sections 14, 22 and  
23 Township 5 South, Range 14  
West, Indiana

Variation  $4^{\circ}30'$

From the corner of Sections  
22, 23, 26 and 27 I run

24.35

North between Sections 22 &  
23 variation  $4^{\circ}30'$  west to the top  
of the bank of the Island chute  
and not finding the original  
meander corner established one  
by setting a post, from which a  
cottonwood bears North 41 links  
distant.

7.48

From thence set a flag on  
the Island where a continua-  
tion of the line between 22  
and 23 struck the Island (then  
ascertained the distance to be  
7.48 chains.

December 11, 1888

Set meander post No 1 in  
place of the flag, from which a  
Sycamore 20 in dia. bears S 63 W 75 lks distant  
a willow 19 in dia bears  
S 14 W 45 links distant.

From meander post No 1  
continued North between Sections  
22 and 23 through the Island  
to where the line left the Survey  
21.50 Set a meander post No 2 from  
which a Sycamore 48 in dia  
bears N 25 W 64 links distant  
and a cottonwood 36 in dia  
bears N 72 W 51 links distant.

I now go to the corner of sections 13, 14, 23 and 24, an original corner that has been ~~extab~~ ascertained and reestablished by a County Surveyor, and run thence west

Variation  $4^{\circ}30'$  South  
63.00 to the east bank of the Wabash River, and failing to find the original meander corner, set a post from which a Sycamore 30 in dia bears  $S 85^{\circ} W$  10 links distant, and cause a flag to be placed on the Island in the section line

From this M. C., I measure a base line 3.87 chains south to a point from which the flag on Island bears  $N 34^{\circ} W$ . I compute the distance as follows 2.61 chains

This distance added to 63.00 gives from the Section Corner

65.61.

I now establish the meander corner No 4 on Island which is a post witnessed by a Pecan 8 in dia bears  $N 34^{\circ} E$  32 links distant.

Then west with same variation, set a post at M. C. cor. No 3, from which a Sycamore 24 in dia bears  $N 43\frac{1}{2}^{\circ} W$  36 links distant.

I now commence at Post No 2 and meander the Island as follows;

$N 15^{\circ} E$  5.00 chains, thence  
 $N 12^{\circ} E$  3.73 chains thence

N 15 E 8.77 chains, thence  
 N 16 E 8.30 chains, thence  
 N 12 E 1.78 chains, to  
 Meander post No 3, thence  
 N 12 E 6.12 chains to  
 head of Island, thence  
 S 36 E 1.15 chains, thence  
 S 9 E 4.00 chains, thence  
 S 6 W 1.12 chains to  
 Meander post No 4, thence  
 S 6 W 4.11 chains, thence  
 South 7.00 chains, thence  
 S 2 W 5.38 chains, thence  
 S 5 W 5.50 chains, thence  
 S 17 W 14.85 chains, thence  
 S 18 W 2.63 chains, thence  
 S 20 W 5.00 chains, thence  
 S 13 W 2.60 chains, thence  
 S 17 W 2.37 chains, ~~thence~~  
 to meander corner No 1. on  
 the Island Chute in See, line  
 thence  
 S 25 W 1.05 chains, thence  
 S 24 W 3.00 chains, thence  
 S 32 W 6.50 chains, thence  
 S 34 W 3.45 chains, thence  
 S 31 W 2.40 chains, thence  
 S 30 W 2.83 chains, ~~thence~~  
 to the lower end or foot of  
 the Island, thence  
 North 38 W 1.42 chains, thence  
 N 14 1/2 E 13.00 chains, thence  
 N 16 E 12.00 chains, thence  
 N 14 E 13.78 chains to  
 Meander post No 2 and  
 place of beginning con-  
 taining  $34.\frac{60}{100}$  acres

December 12, 1888  
 (May 6, 1889)

5

There are 26 acres cleared land which has been tilled for a number of years, Soil Sandy loam, several varieties of timber, Deciduous, Hackberry, Box Alder, and Cottonwood predominating, under growth Spice and vines, subject to overflow annually, no improvements of any kind, lies  $3\frac{1}{2}$  miles south west of New Harmony, Ind<sup>a</sup>, 12 miles from Carni Illinois, and 14 miles from Mount Vernon Ind<sup>a</sup>; Such proximity does not increase its value to any great extent, The Wabash River is navigable for three or four months in each year on an average, The depth of the water between Island and main shore is about  $2\frac{1}{2}$  feet at an average stage of water.
